Drinking Water Lead Sample Results Table for the Lead Consumer Notice

(Safe Drinking Water Act, 1976 PA 399, as amended)

The table below lists the most recent drinking water quality lead sample results. Lead samples are collected where cold water is typically drawn for consumption, such as drinking fountains, kitchen and classroom sinks, and break room faucets. Each facility has an established sample siting plan to identify approved sample points, in addition to a predetermined monitoring frequency.

Water System Name : VESTABURG HIGH SCHOOL		WSSN: 2004359

For information on the health effects of lead and reducing your exposure to lead, call the National Lead Information Center at 800-424-LEAD (5323), visit the U.S. EPA's Web site at www.epa.gov/lead, or contact your health care provider.

Printed: 10/5/2017

^{*} All lead sample results will be reviewed by your local health department to assess compliance with lead regulations and to determine the 90th percentile value. Results that are below the detection limit of the analytical method employed by the laboratory are listed as zero.
